Section 55 Protection of the Environment Operations Act 1997

Environment Protection Licence

Licence Details	
Number:	20696
Anniversary Date:	07-April

Licensee
REMONDIS AUSTRALIA PTY LTD
LEVEL 4/163 O'RIORDAN STREET
MASCOT NSW 2020

Premises
Environmental Treatment Solutions Pty Ltd
7 Pembury Road
MINTO NSW 2566

Scheduled Activity (Act)	Licensing Fee Category (Regulation)	Scale
Waste storage	Waste storage - hazardous, restricted solid, liquid, clinical and related waste and asbestos waste	Any listed waste type stored

Information about this licence

Dictionary

A definition of terms used in the licence can be found in the dictionary at the end of this licence.

Responsibilities of licensee

Separate to the requirements of this licence, general obligations of licensees are set out in the Protection of the Environment Operations Act 1997 ("the Act") and the Regulations made under the Act. These include obligations to:

- ensure persons associated with you comply with this licence, as set out in section 64 of the Act;
- control the pollution of waters and the pollution of air (see for example sections 120 - 132 of the Act);
- report incidents causing or threatening material environmental harm to the environment, as set out in Part 5.7 of the Act.

Variation of licence conditions

The licence holder can apply to vary the conditions of this licence. An application form for this purpose is available from the EPA.

The EPA may also vary the conditions of the licence at any time by written notice without an application being made.

Where a licence has been granted in relation to development which was assessed under the Environmental Planning and Assessment Act 1979 in accordance with the procedures applying to integrated development, the EPA may not impose conditions which are inconsistent with the development consent conditions until the licence is first reviewed under Part 3.6 of the Act.

Duration of licence

This licence will remain in force until the licence is surrendered by the licence holder or until it is suspended or revoked by the EPA or the Minister. A licence may only be surrendered with the written approval of the EPA.

Licence review

The Act requires that the EPA review your licence at least every 5 years after the issue of the licence, as set out in Part 3.6 and Schedule 5 of the Act. You will receive advance notice of the licence review.

Fees and information to be sent to the EPA

For each licence fee period you must pay:

- an administrative fee; and
- a load-based fee (if applicable).

Usually, the licence fee period is the same as the reporting period.

The EPA publication “A Guide to Licensing” contains information about how to calculate your licence fees.

A licence subject to load-based licensing (LBL) requires an Annual Return to be submitted to the EPA, comprising a Statement of Compliance for Load Based Fee Calculation for each assessable pollutant required by the licence. The Annual Return must be submitted by the “due date”, as defined in the dictionary at the end of the licence. Refer to the Annual Return reporting requirements under Section 6 “Reporting Conditions”.

Transfer of licence

The licence holder can apply to transfer the licence to another person. An application form for this purpose is available from the EPA.

Public register and access to monitoring data

Part 9.5 of the Act requires the EPA to keep a public register of details and decisions of the EPA in relation to, for example:

- licence applications;
- licence conditions and variations;
- statements of compliance;
- load based licensing information; and
- load reduction agreements.

Under s320 of the Act application can be made to the EPA for access to monitoring data which has been submitted to the EPA by licensees.

This licence is issued to:

Licensee
REMONDIS AUSTRALIA PTY LTD
LEVEL 4/163 O'RIORDAN STREET
MASCOT NSW 2020

subject to the conditions which follow.

1 Administrative Conditions

A1 What the licence authorises and regulates

A1.1 This licence authorises the carrying out of the scheduled activities listed below at the premises specified in A2. The activities are listed according to their Scheduled Activity (Act) classification, Licensing Fee Category (Regulation) classification and the scale of the operation.

Unless otherwise further restricted by a condition of this licence, the scale at which the activity is carried out must not exceed the maximum scale specified in this condition.

Scheduled Activity (Act)	Licensing Fee Category (Regulation)	Scale
Waste storage	Waste storage - hazardous, restricted solid, liquid, clinical and related waste and asbestos waste	Any listed waste type stored

A2 Premises or plant to which this licence applies

A2.1 The licence applies to the following premises:

Premises Details
Environmental Treatment Solutions Pty Ltd
7 Pembury Road
MINTO NSW 2566
LOT //DP

A3 Information supplied to the EPA

A3.1 Works and activities must be carried out in accordance with the proposal contained in the licence application, except as expressly provided by a condition of this licence.

In this condition the reference to "the licence application" includes a reference to:
a) the applications for any licences (including former pollution control approvals) which this licence replaces under the Protection of the Environment Operations (Savings and Transitional) Regulation 1998; and
b) the licence information form provided by the licensee to the EPA to assist the EPA in connection with the issuing of this licence.

2 Discharges to Air and Water and Applications to Land

P1 Location of monitoring/discharge points and areas

P1.1 The following utilisation areas referred to in the table below are identified in this licence for the purposes of the monitoring and/or the setting of limits for any application of solids or liquids to the utilisation area.

3 Limit Conditions

L1 Pollution of waters

L1.1 Except as may be expressly provided in any other condition of this licence, the licensee must comply with section 120 of the Protection of the Environment Operations Act 1997.

L2 Waste

L2.1 The licensee must not cause, permit or allow any waste to be received at the premises, except the wastes expressly referred to in the column titled "Waste" and meeting the definition, if any, in the column titled "Description" in the table below.
Any waste received at the premises must only be used for the activities referred to in relation to that waste in the column titled "Activity" in the table below.
Any waste received at the premises is subject to those limits or conditions, if any, referred to in relation to that waste contained in the column titled "Other Limits" in the table below.
This condition does not limit any other conditions in this licence.

Waste	Description	Activity	Other Limits
A100 - Waste from surface treatment of metals & plastics		Waste storage	
D120 - Mercury; mercury compounds	Includes mercury lamps and fluorescent tubes	Waste storage	
D150 - Cadmium; cadmium compounds	Includes nickel cadmium batteries	Waste storage	
D230 - Zinc compounds		Waste storage	
D300 - Non toxic salts	Excludes non-toxic salts that exhibit characteristics defined by UN Code H1, H3, H4.1, H4.2, H4.3, H5.1,	Waste storage	

	H5.2 or H10 in Schedule 1 Part 3 of the POEO (Waste) Regulation 2014		
F110 - Waste resin, latex, plasticiser, glue & adhesive		Waste storage	
F100 - Waste ink, dye, pigment, paint, lacquer & varnish		Waste storage	
J120 - Waste oil/hydrocarbons mixtures/emulsions in water		Waste storage	
J100 - Waste mineral oils unfit for their original intended use		Waste storage	
NA - Food waste	Only food waste (liquid/solid) as defined in the EPA's Waste Classification Guidelines as in force from time to time	Waste storage	
M220 - Isocyanate compounds		Waste storage	
N100 - Containers & drums containing controlled waste residues	Only containers & drums that are contaminated with residues of a substance or substances referred to in this licence	Waste storage	
N120 - Soils contaminated with a substance or waste referred to in Parts 1 or 2 of Schedule 1 of the Protection of the Environment Operations (Waste) Regulation 2014	Only contaminated soil that is contaminated with a substance or substances referred to in this licence; and which has been assessed and classified in accordance with EPA's Waste Classification Guidelines as in force from time to time	Waste storage	

N190 - Filter cake	Only filter cake that has been fully characterised	Waste storage	
N205 - Industrial waste treatment/disposal residues	Only residues that have been fully characterised	Waste storage	
R120 - Waste pharmaceuticals, drugs and medicines		Waste storage	
R140 - Waste from the production & preparation of pharmaceutical products		Waste storage	
T100 - Waste chemical substances arising from research and development or teaching activities, including those that are not identified and/or are new and whose effects on human health and/or the environment are not known		Waste storage	
T120 - Photographic chemicals & processing waste		Waste storage	
J160 - Waste tarry residues	Only residues that have been fully characterised	Waste storage	
N150 - Fly ash	Only incineration fly ash that has been classified in accordance with the EPA's Waste Classification Guidelines as in force from time to time	Waste storage	
A110 - Cyanide waste from heat treatment & tempering ops		Waste storage	
A130 - Cyanides (inorganic)		Waste storage	
B100 - Acidic solutions or acids in solid form		Waste storage	

C100 - Basic solutions or bases in solid form		Waste storage	
D100 - Metal carbonyls		Waste storage	
D110 - Inorganic fluorine compounds excl calcium fluoride		Waste storage	
D130 - Arsenic; arsenic compounds		Waste storage	
D140 - Chromium compounds (hexavalent and trivalent)		Waste storage	
D160 - Beryllium; beryllium compounds		Waste storage	
D170 - Antimony; antimony compounds		Waste storage	
D180 - Thallium; thallium compounds		Waste storage	
D190 - Copper compounds		Waste storage	
D200 - Cobalt compounds		Waste storage	
D210 - Nickel compounds		Waste storage	
D220 - Lead; lead compounds	Include used lead acid batteries	Waste storage	
D240 - Selenium; selenium compounds		Waste storage	
D250 - Tellurium; tellurium compounds		Waste storage	
D270 - Vanadium compounds		Waste storage	
D290 - Barium compounds (excluding barium sulphate)		Waste storage	

D310 - Boron compounds		Waste storage	
D330 - Inorganic sulfides		Waste storage	
D340 - Perchlorates		Waste storage	
D350 - Chlorates		Waste storage	
D360 - Phosphorus compounds excluding mineral phosphates		Waste storage	
E100 - Waste containing peroxides excl hydrogen peroxide		Waste storage	
E120 - Explosive waste not subject to other legislation		Waste storage	
G100 - Ethers		Waste storage	
G110 - Organic solvents, excluding halogenated solvents.		Waste storage	
G150 - Halogenated organic solvents		Waste storage	
G160 - Waste from the production, formulation, and use of organic solvents		Waste storage	
H100 - Waste biocides and phytopharmaceuticals		Waste storage	
H110 - Organic phosphorous compounds		Waste storage	
H170 - Waste wood-preserving chemicals		Waste storage	
K100 - Animal effluent & residues-abattoir, poultry, fish		Waste storage	

K140 - Tannery waste incl leather dust/ash/sludge/flour		Waste storage	
K190 - Wool scouring wastes		Waste storage	
M100 - Waste substances & articles containing or contaminated with polychlorinated biphenyls, polychlorinated napthalenes, polychlorinated terphenyls &/or polybrominated biphenyls		Waste storage	
M150 - Phenols, phenol compounds including chlorophenols		Waste storage	
M160 - Organohalogen compounds not elsewhere listed		Waste storage	
M210 - Cyanides (organic)		Waste storage	
M230 - Triethylamine catalysts for setting foundry sands		Waste storage	
M250 - Surface active agents (surfactants), containing principally organic constituents and which may contain metals and inorganic materials	Surface active agents that contain Poly- & perfluoroalkyl chemicals must be identified and stored separately	Waste storage	
M260 - Highly odorous organic chemicals (including mercaptans and acrylates)		Waste storage	
N140 - Fire debris and fire washwaters	Fire debris and fire washwater that contain poly- & perfluoroalkyl chemicals must be identified and stored separately	Waste storage	

N160 - Encapsulated, chemically-fixed, solidified or polymerised wastes		Waste storage	
N220 - Asbestos		Waste storage	
N230 - Ceramic-based fibres similar to asbestos		Waste storage	
R100 - Clinical and related wastes		Waste storage	
R130 - Cytotoxic		Waste storage	Total quantity of waste at premises must not exceed 200 tonnes at any one time.
T140 - Tyres		Waste storage	
NA - Batteries	Batteries (Including Embedded) All chemistries including lithium, lead, zinc carbon, nickel, alkaline and mixed batteries	Waste storage	Total quantity of Batteries (including embedded) at premises must not exceed 5 tonnes at any one time.

L2.2 Maximum quantity of waste at the premises must not exceed 200 tonnes at any one time.

4 Operating Conditions

O1 Activities must be carried out in a competent manner

O1.1 Licensed activities must be carried out in a competent manner.
This includes:
a) the processing, handling, movement and storage of materials and substances used to carry out the activity; and
b) the treatment, storage, processing, reprocessing, transport and disposal of waste generated by the activity.

O2 Maintenance of plant and equipment

O2.1 All plant and equipment installed at the premises or used in connection with the licensed activity:
a) must be maintained in a proper and efficient condition; and
b) must be operated in a proper and efficient manner.

O3 Processes and management

O3.1 The licensee must ensure that all liquid materials including chemicals, fuels, oils, and waste materials are stored in a designated impervious bund that contains 110% of the largest container/tank contained within the bund

O3.2 The licensee must ensure that all waste handling, loading and unloading must be conducted wholly within bunds and under cover.

O4 Waste management

O4.1 The licensee must undertake an initial characterisation of all wastes to ensure it is a waste that it is licensed to receive at the premises. This characterisation must be documented and retained by the licensee.

O4.2 The licensee must ensure that all waste materials including containers & drums containing waste materials referred to in this licence and containers & drums that are contaminated with residues of a substance or substances referred to in this licence, but excluding waste that are DG class 2.1 and DG class 3 Packing groups II & III are handled and stored only within the building and within bunded area at all times.

O4.3 The licensee must ensure that any waste, destined for off-site transport must be assessed characterised and/or classified in accordance with the EPA's Waste Classification Guidelines as in force from time to time, before transporting it from the premises.

O4.4 When waste is transported from the premises, the licensee must ensure that the waste is transported:

(a) by a waste transporter licensed to transport such waste; and

(b) to a place that can lawfully be used as a waste facility for that waste.

O4.5 **Dangerous Goods**

(i) Waste materials that are classified as 'dangerous goods' under the *Australian Code for the Transport of Dangerous Goods by Road and Rail* as in force from time to time must only be stored under a valid '*Acknowledgement of Notification of Dangerous Goods on Premises'* issued by SafeWork NSW.

(ii) The storage and handling of dangerous goods at the premises must be carried out in accordance with *AS/NZS 3833-2024: The storage and handling of mixed classes of dangerous goods, in packages and intermediate bulk containers* or any revisions of that standard which may be made by Standards Australia.

5 Monitoring and Recording Conditions

M1 Monitoring records

M1.1 The results of any monitoring required to be conducted by this licence or a load calculation protocol must be recorded and retained as set out in this condition.

M1.2 All records required to be kept by this licence must be:
a) in a legible form, or in a form that can readily be reduced to a legible form;
b) kept for at least 4 years after the monitoring or event to which they relate took place; and
c) produced in a legible form to any authorised officer of the EPA who asks to see them.

M1.3 The following records must be kept in respect of any samples required to be collected for the purposes of this licence:
a) the date(s) on which the sample was taken;
b) the time(s) at which the sample was collected;
c) the EPA point identification number for the point at which the sample was taken; and
d) the name of the person who collected the sample

M2 Recording of pollution complaints

M2.1 The licensee must keep a legible record of all complaints made to the licensee or any employee or agent of the licensee in relation to pollution arising from any activity to which this licence applies.

M2.2 The record must include details of the following:
a) the date and time of the complaint;
b) the method by which the complaint was made;
c) any personal details of the complainant which were provided by the complainant or, if no such details were provided, a note to that effect;
d) the nature of the complaint;
e) the action taken by the licensee in relation to the complaint, including any follow-up contact with the complainant; and
f) if no action was taken by the licensee, the reasons why no action was taken.

M2.3 The record of a complaint must be kept for at least 4 years after the complaint was made.

M2.4 The record must be produced to any authorised officer of the EPA who asks to see them.

M3 Telephone complaints line

M3.1 The licensee must operate during its operating hours a telephone complaints line for the purpose of receiving any complaints from members of the public in relation to activities conducted at the premises or by the vehicle or mobile plant, unless otherwise specified in the licence.

M3.2 The licensee must notify the public of the complaints line telephone number and the fact that it is a complaints line so that the impacted community knows how to make a complaint.

M3.3 The preceding two conditions do not apply until three months after the date of the issue of this licence.

6 Reporting Conditions

R1 Compliance, and annual reporting requirements

Compliance with licence conditions

R1.1 The licensee must supply the EPA, via the EPA's online digital portal, the following details of any non-compliance with the conditions of the licence within 21 days after the licensee becomes aware of the non-compliance:

a. the date the licensee became aware of the non-compliance;
b. the date(s) the non-compliance occurred, including if the non-compliance is continuing;
c. whether the non-compliance relates to air, water/land, noise or waste matters (if applicable);
d. whether the non-compliance relates to a pollution incident;
e. the licence condition(s) not complied with;
f. a summary of particulars of the non-compliance, including (if known):
    i. the location where the non-compliance occurred;
    ii. the duration of the non-compliance;
    iii. if the non-compliance is continuing, the suspected end date of the non-compliance;
g. the cause or suspected cause of the non-compliance;
h. any action taken, or proposed to be taken, to mitigate the effects of the non-compliance; and
i. any action taken, or proposed to be taken, to prevent a recurrence of the non-compliance.

R1.2 The EPA may make a written request for further details in relation to each non-compliance reported in accordance with Condition R1.1. The licensee must provide such further details to the EPA, via the EPA's online digital portal, within the time specified in the request.

R1.3 Condition R1.1 does not apply where a non-compliance with a licence condition has been identified by the EPA as part of an EPA environmental compliance audit.

Reporting transition arrangements

R1.4 By 05 August 2026, the licensee must supply to the EPA, via the EPA's online digital portal the details required in Condition R1.1 for any non-compliance with the conditions of the licence that occurred:

i. after the date the licensee supplied their last Statement of Compliance - Licence Conditions to the EPA, and
ii. before the date of the notice of variation of licence that added this condition to this Licence.

Pollution monitoring data summary

R1.5 If the licensee undertakes monitoring as a result of a licence condition, the licensee must supply to the EPA a summary of the results of the pollution monitoring data in respect of each reporting period. The summary must be provided as a Microsoft Excel file, formatted with the following column headings:

a. EPA point identification number;
b. pollutant;

c. unit of measure;
d. number of samples required;
e. number of samples collected and analysed;
f. lowest sample value;
g. mean of sample values; and
h. highest sample value.

The pollution monitoring data summary for the reporting period must be supplied to the EPA via the EPA's online digital portal by the "due date", as defined in the dictionary at the end of this licence.

R2 Notification of environmental harm

R2.1 Notifications must be made by telephoning the Environment Line service on 131 555.

Note: The licensee or its employees must notify all relevant authorities of incidents causing or threatening material harm to the environment immediately after the person becomes aware of the incident in accordance with the requirements of Part 5.7 of the Act.

R2.2 The licensee must provide written details of the notification to the EPA within 7 days of the date on which they became aware of the incident.

R3 Written report

R3.1 Where an authorised officer of the EPA suspects on reasonable grounds that:
a) where this licence applies to premises, an event has occurred at the premises; or
b) where this licence applies to vehicles or mobile plant, an event has occurred in connection with the carrying out of the activities authorised by this licence, and the event has caused, is causing or is likely to cause material harm to the environment (whether the harm occurs on or off premises to which the licence applies), the authorised officer may request a written report of the event.

R3.2 The licensee must make all reasonable inquiries in relation to the event and supply the report to the EPA within such time as may be specified in the request.

R3.3 The request may require a report which includes any or all of the following information:
a) the cause, time and duration of the event;
b) the type, volume and concentration of every pollutant discharged as a result of the event;
c) the name, address and business hours telephone number of employees or agents of the licensee, or a specified class of them, who witnessed the event;
d) the name, address and business hours telephone number of every other person (of whom the licensee is aware) who witnessed the event, unless the licensee has been unable to obtain that information after making reasonable effort;
e) action taken by the licensee in relation to the event, including any follow-up contact with any complainants;
f) details of any measure taken or proposed to be taken to prevent or mitigate against a recurrence of such an event; and
g) any other relevant matters.

R3.4 The EPA may make a written request for further details in relation to any of the above matters if it is not satisfied with the report provided by the licensee. The licensee must provide such further details to the EPA within the time specified in the request.

7 General Conditions

G1 Copy of licence kept at the premises or plant

G1.1 A copy of this licence must be kept at the premises to which the licence applies.

G1.2 The licence must be produced to any authorised officer of the EPA who asks to see it.

G1.3 The licence must be available for inspection by any employee or agent of the licensee working at the premises.

8 Special conditions

E1 Requirement to maintain Fiancial Assurance

E1.1 A financial assurance in the form of an unconditional and irrevocable and on demand guarantee from a bank, building society or credit union operating in Australia as "Authorised Deposit-taking Institutions" under the banking Act 1959 of the Commonwealth of Australia and supervised by the Australian Prudential regulatory Authority (APRA) must be provided to the EPA prior to the issue of this licence. The financial assurance must be favour of the EPA in the amount of hundred thousand dollars ($100,000.00). The financial assurance is required to secure or guarantee funding for works or programs required by or under this licence. The financial assurance must contain a term that provides that any monies claimed can be paid to the EPA or, at the written direction of the EPA, to any other person.

The licensee must provide to the EPA, along with the original counterpart guarantees, confirmation in writing that the financial institution providing the guarantees is subject to supervision by APRA.

E1.2 The financial assurance must be maintained during the operation of the facility and thereafter until such time as the EPA is satisfied the premises is environmentally secure.

E1.3 The financial assurance must be replenished by the full amount claimed or realised if the EPA has claimed on or realised the financial assurance or any part of it to undertake a work or program required to be carried out by the licence which has not been undertaken by the licence holder.

E1.4 The EPA may require an increase in the amount of the financial assurance at any time as a result of reassessment of the total likely costs and expenses of rehabilitation of the premises.

E1.5 The licensee must provide to the EPA the original counterpart guarantee within five working days of the issue of:

a) the financial assurance required by condition E1.1 and
b) the adjusted financial assurance as required by condition , E1.3 and E1.4.

E2 Claims on Financial Assurances

E2.1 The EPA may claim on a financial assurance under s303 of the POEO Act if a licensee fails to carry out any work or program required to comply with the conditions of this licence.

E3 Waste Management Plan

E3.1 The Licensee must develop a Waste Management Plan (the Plan) for the Premises. The Plan must ensure compliance with the conditions of this licence and all applicable environmental legislation.

E3.2 The Plan must be developed in accordance with all applicable and current guidelines and legislation, including but not limited to:

a) Australian Standard AS 3833:2024 - the storage and handling of mixed classes of dangerous goods, in packages and intermediate bulk containers.

b) Any Australian or Joint Standard for a specific type of dangerous good.

c) NSW EPA Waste Classification Guides. Part 1: Classifying Waste.

d) Australian Code for the Transport of Dangerous Goods by Road & Rail, Edition 7.8.

E3.3 The Plan must comprehensively address, but is not limited to, the following elements:

a) A detailed description and identification of designated waste storage areas on the premises, including pollution mitigation measures and control systems.

b) An accurate assessment of the storage capacity for each designated waste storage area.

c) Clear segregation protocols for all incompatible chemicals stored at the premises.

d) Stockpile management considerations such as volume, size, stability, height, accessibility, and separation distances

e) A comprehensive procedure for the storage, handling, decanting, consolidation and transferring for each type of waste, dangerous good, and chemical received, held or processed at the premises

f) Waste identification procedures for all accepted waste, including but not limited to labelling and placarding.

g) A comprehensive procedure for the marking, labelling, placarding, and packing of dangerous goods for transport, including the suitability of packaging and overpacking methods

h) A robust employee training and development program to ensure all staff are fully educated on the Plan's requirements and procedures, enabling effective implementation.

E3.4 By 30 November 2025, the Licensee must submit a draft version of the Waste Management Plan developed by a suitably qualified Environmental consultant to the EPA.

Dictionary

General Dictionary

3DGM [in relation to a concentration limit]	Means the three day geometric mean, which is calculated by multiplying the results of the analysis of three samples collected on consecutive days and then taking the cubed root of that amount. Where one or more of the samples is zero or below the detection limit for the analysis, then 1 or the detection limit respectively should be used in place of those samples
Act	Means the Protection of the Environment Operations Act 1997
activity	Means a scheduled or non-scheduled activity within the meaning of the Protection of the Environment Operations Act 1997
actual load	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2022
AM	Together with a number, means an ambient air monitoring method of that number prescribed by the Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales.
AMG	Australian Map Grid
anniversary date	The anniversary date is the anniversary each year of the date of issue of the licence. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act.
Approved Methods Publication	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2022
assessable pollutants	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2022
BOD	Means biochemical oxygen demand
CEM	Together with a number, means a continuous emission monitoring method of that number prescribed by the *Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales*.

COD	Means chemical oxygen demand
composite sample	Unless otherwise specifically approved in writing by the EPA, a sample consisting of 24 individual samples collected at hourly intervals and each having an equivalent volume.
cond.	Means conductivity
due date	Means: i) not later than 60 days after the end of each reporting period; or ii) in the case of a transferring licence - not later than 60 days after the date the transfer was granted.
environment	Has the same meaning as in the Protection of the Environment Operations Act 1997
environment protection legislation	Has the same meaning as in the Protection of the Environment Administration Act 1991
EPA	Means the Environment Protection Authority of New South Wales.
EPA Online digital portal	Means eConnect EPA
general solid waste (non-putrescible)	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
flow weighted composite sample	Means a sample whose composites are sized in proportion to the flow at each composites time of collection.
general solid waste (putrescible)	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
grab sample	Means a single sample taken at a point at a single time
hazardous waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
licensee	Means the licence holder described at the front of this licence
Licensing Fee Category (Regulation)	Means the numbered short descriptions in Schedule 1 of the Protection of the Environment Operations (General) Regulation 2022.
load calculation protocol	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2022

local authority	Has the same meaning as in the Protection of the Environment Operations Act 1997
material harm	Has the same meaning as in section 147 of the Protection of the Environment Operations Act 1997
MBAS	Means methylene blue active substances
Minister	Means the Minister administering the Protection of the Environment Operations Act 1997
mobile plant	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
motor vehicle	Has the same meaning as in the Protection of the Environment Operations Act 1997
O&G	Means oil and grease
Percentile [in relation to a concentration limit of a sample]	Means that percentage [eg.50%] of the number of samples taken that must meet the concentration limit specified in the licence for that pollutant over a specified period of time. In this licence, the specified period of time is the Reporting Period unless otherwise stated in this licence.
plant	Includes all plant within the meaning of the Protection of the Environment Operations Act 1997 as well as motor vehicles.
pollution incident	Has the same meaning as in the Protection of the Environment Operations Act 1997
